

ANUKRATI MEHTA

FRONTEND DEVELOPER

Enterprising individual with a passion for designing dynamic user experiences and building responsive web design & products. Proficient in JavaScript, HTML5, CSS, React.js, MongoDB, Express.js and Node.js. Skilled in application layers, presentation layers, and databases, and certified in both F/E & B/E technologies. Interested in the entire frontend spectrum and working on ambitious projects with positive people.

PROJECTS

Hear Hear! Music Player

The [Hear, Hear!](#) music player is a dynamic web platform for music discovery and listening.

- Features include a music player, related songs, and songs by a particular artist.
- Utilizes free Shazam API to fetch music information.
- Leveraged skills in API integration, database management, and full-stack web development to create a responsive and user-friendly interface.

SQL Data Visualization App

A [data visualization web app](#) that extracts and cleans data from a SQL database to generate insights.

- Employed advanced techniques to extract and clean data from an SQL database (MySQL).
- Analyzed data to generate meaningful insights.
- Wrote SQL queries to manipulate data to arrive at compelling data-driven information.
- Communicate insights through Tableau visualizations.

Tic-Tac-Toe Web Game

A [data visualization web app](#) that extracts and cleans data from a SQL database using advanced techniques to then generate meaningful insights.

- Fun and interactive Tic-Tac-Toe game developed using Javascript.
- Utilized skills in Javascript, HTML, and CSS to create game logic and implement user interaction.
- Project showcases the ability to build dynamic web applications and bring traditional games to life in a digital format.

Calculator App

A feature rich [web-based calculator app](#) to enable mathematical functions through a user-friendly interface.

- Feature-rich calculator built using JavaScript.
- Performs basic arithmetic operations: addition, subtraction, multiplication, and division.
- Employs dual display; one for inputting numbers for new calculations and the other for displaying previous calculations.
- User-centered approach taken in development of the app to build an intuitive interface.
